Summary

I am Web Developer with 1 year of experience in building a web application by ReactJS/Nextjs

Objectives

In the next 2 years, I will work and learn aggressively to push myself toward the goal of becoming an experienced Fullstack developer

Technical Skills

- **Frontend Frameworks /Libraries:**
 - ReactJs for Client Side rendering (React Hooks)
 - NextJS for Server Side rendering
 - CSS: Material Ui, Tailwindcss, Bootstrap, Sass,...
 - Next-Auth, Redux
- **Backend basic knowledge about:**
 - MVC
 - Nodejs, ExpressJs, Sequelize, MySQL
 - Firebase/ Sanity / jsonserver/ mockApi
 - PHP, Laravel,...
- **Version Control:**
 - Github, Bitbucket, Sourcetree
- **Soft Skills:**
 - Teamwork
 - Highly adaptable
- **Others:**
 - Experience in working with Microsoft Team, X-mind
 - Can read Document and Requirements fast and efficiently
 - Always learn many efficient ways to approach the problem

Certifications

Bachelor of Accountant: **Nha Trang University – 2014**

Front-End Developer: **Cybersoft Academy**

Experiences

Calamari clone:

On-going

- NextJs 12, Next-Auth, Sass module, Fullcalendar
- Team—size: 1
- Build the project structure
- Fake api by using mockApi for database
- Using Next-Auth for authentication
- Build Difference layout for Login/Signup and Main page
- Apply fullcalendar library for showing and interacting Calendar,
- CRUD event/absence/user and save to MockApi
- Using SSG, ISR, CSR in specified pages
- Update data using on-demand revalidations

E-Learning

<https://elearning-juil53.vercel.app/>

- ReactJS (Hook), Redux thunk, MaterialUI, Slick carousel,...
- I made the project structure, install necessary library and assign tasks for my team member
- Apply Redux thunk to manage state data
- Made the homepage, About, Login, Register
- Made admin page layout
- Create/Read/Update/Delete course (database, api provided by cybersoft center)
- Handle Login/Logout by tracking jwt token save at localstorage

Diner Landing Page

<https://diner-bc-20.vercel.app/>

- Technologies used: HTML, CSS, Bootstrap, Slick, SCSS
- I made this responsive page by using bootstrap, slick carousel
- Some javascript to turn dark mode, modal,...

Samar Landing Page

<https://samar-five.vercel.app/#>

- HTML, CSS, Bootstrap, animation libraries
- I made this page by using css, slick carousel
- Apply some animation by css
