- NodeJS, ExpressJS, Sequelize
- TailwindCss, MaterialUI, SASS, Angular Material
- Redux Toolkit, Next-Auth, Firebase, NgRx

Database Management Systems: MySQL, MongoDB

Foreign Languages: Toeic 620

Others:

- Understanding of OOP methodologies, MVC
- Experience with Github, Bitbucket, Sourcetree

EDUCATION:

Cybersoft Academy: FrontEnd Developer (9.7/10)

EXPERIENCES:

PIVOT VIETNAM – Front end Developer (03/2022 – 03/2023)

- Updating project interface through figma design
- Updating features in CMS pages
- Investigating arising bugs and reporting to senior

- Utilizing firebase for authentication and store data
- Building up UI for users pages
- Building up Admin page to manage product, chart, CRUD
- Building up feature Search, filter
- Uploading Images and store in firebase
- Reviewing code with Senior member to improve coding convention
- Self-studying new technologies

PERSONAL PROJECT

o **Todo List** (https://angular-todos-pearl.vercel.app/)

Description: To do List

(email: nghia@example.com / password: 12345)

Implement basic Angular

- CRUD todo, Authentication, Auth Guard Role, Validation
- Use two type of creating form (Template Driven for Login, and Reaction Form for Register)
- Style with Angular Material
- Mock database on Mockapi
- Creat custom Pipe to filter todo
- Clear all completed
- Register user (only log in console)

Technologies:

- FrontEnd: Angular 15, Angular Material
- BackEnd: Mockapi

o **Calamari** (https://calamari-fe.vercel.app/)

Description: Leave management for company

Role Staff:

- Request a leave by filling form and tracking the approving progress

Role Admin:

- Check the incoming request, approve or decline

- Create the absence types, roles
- Create account for new staff

Technologies:

- FrontEnd: NextJS(v12), NextAuth, SASS, Fullcalendar
- BackEnd: Nodejs, ExpressJs, MongoDb, MVC

o **E-Learning** (https://elearning-juil53.vercel.app/)

Description:

Implement User/Admin interfaces

Apply Redux to manage state

Role Admin can Create, Read, Update, Delete Course

Handle authentication using JWT

Technologies: ReactJS, Redux Thunk, MaterialUI
